SENIOR CONSERVATION MANAGER

The Mason Conservation District has an exciting career opportunity for a person with skills and interest in leading and supporting a dynamic team. The successful candidate will be responsible for safe, timely, and efficient execution of small and large scale conservation projects.

The Senior Conservation Manager position is responsible for project development and coordination between the District, landowners, partner organizations, and investors.

The position supports the District’s mission by developing, funding, and implementing conservation projects in Puget Sound watersheds.

The successful candidate will demonstrate the proven ability to manage complex projects involving diverse partners and stakeholders on private and public lands.

This position is supervised by the District Manager.

ESSENTIAL DUTIES AND RESPONSIBILITIES: Core duties and responsibilities include the following. Other duties may be assigned.

• Supervise and empower the daily operations of a team of scientists, technicians, planners, and engineers in support of the environmental missions of the Mason Conservation District. Sustain enthusiasm in and devotion to the team.

• Lead the development, implementation, and evaluation of multi-year, technically complex ecological restoration projects with diverse partners and funding sources.

• Collaborate with District team and partners to secure funding for high priority projects by actively pursuing potential funding sources.

• Prepare and implement work plans, balance work load, establish and communicate performance expectations, and provide staff with necessary resources for success.

• Manage hiring, promote career development, ensure and appraise performance, implement pro-equity practices, and address conflicts and disciplinary issues.

• Assist staff in developing formal agreements and contracts with agencies and consultants to ensure they are executed to meet agreed-upon expectations.

• Provide input into the development of annual and long-range plans, project proposals, special projects, etc.

• Engage in continuous improvement focused on process improvements to reduce wasted effort and increased efficiencies.

Project Management:

• Develop and maintain exceptional relationships with clients and partners.

• Coordinate and schedule field and office activities on assigned projects. Determine resource allocation needs to accomplish scheduled tasks including equipment, manpower, etc., including job scheduling activities.

• Manage budgets, deadlines, deliverables, and quality of work on multiple projects simultaneously.
• Develop project scopes of work, sequencing, implementation approach and cost estimates.
• Present projects in public meetings, technical working groups, District Board of Supervisors meetings, etc.
• Prepare oral and written project progress and completion reports.
• Directs contract and project management. Writes and manages contracts, permit applications and reports. Manages consultants and contractors. Responsible for project schedule and quality
• Maintain project files, including documentation of work, receipts, and contract compliance

**Supervisory Responsibilities:** This job has staff supervisory responsibilities and will also supervise sub-contractors.

• Enforce the standards of behavior as well as policies and procedures of the District and ensures adherence to program goals and mission.
• Provide support to technical team for the development and implementation of small-scale conservation and cost-share projects.
• Ensure sub-contractors are meeting contractual deadlines and quality expectations.

**Required Qualifications:**

• College degree in related field, a minimum five (5) years of hands-on ecological restoration experience, with at least three (3) years of experience leading, coordinating and/or managing complex conservation projects.
• Experience in supervising/managing interdisciplinary teams, demonstrating proficiency in creating community and shared vision among team members, and motivating them to action.
• Demonstrated ability to work well with others at all levels of an organization using active listening, settling disputes respectfully, reaching equitable agreements, finding common ground, and maintaining strong relationships.
• Knowledge and background in the construction industry, specifically environmental construction activities, such as: heavy earthmoving, remedial excavation, habitat restoration, bridges and culverts, access roads, stormwater management, etc.
• Knowledge and background in permitting processes to support environmental construction activities.
• Strong understanding of Washington State salmon recovery framework, programs, and processes.
• Must be a self-driven and resourceful team player with the proven ability to solve problems.
• Ability to manage multiple priorities in a fast-paced environment, and work independently.
• Proficient with Microsoft Office Suite, database and geospatial programs.
• Experience using ArcGIS equipment and programs.
• Strong written and verbal communication skills.
• Ability to travel regionally including by car and ferry. Occasional overnight travel is required.
• Ability to work under physically demanding conditions, including weather and terrain.
• Ability to walk, lift 50 pounds, and operate hand and power tools and other mechanical equipment.
• Valid driver’s license, acceptable driving record.
• Ability to pass pre-employment background check, and drug test.

**Desired Qualifications:**
• Experience and proficiency in use of ArcGIS and database software.
• Experience in securing and managing grants.
• Excellent interpersonal and conflict resolution skills.

**Benefits:**
• Industry Competitive Compensation
• Health, Dental, Vision, Disability Plans
• Employer Retirement Plan
